International Study: Engineers in Europe

Dear Ms. Moropoulou,

Few years ago you supported our survey of liberal professions in Europe. We would like to thank you very much for your participation. In the second step of our study, we ask you kindly to assist us by uploading laws/regulations of your country and/or region.

Your participation in this Europe-wide digital project, named CALP, would be very important to understand the regulatory systems based on the specific needs and conditions in the individual European States and regions. As part of the project, you can also set up a profile of your chamber, council or association (professional report) and upload your opinion on politics.

To take part in CALP should not take you more than five minutes. Please click on the link www.calp.uni-koeln.de to get to the project website where you enter the personal access code to register.

Your code: kYcma8

Thank you very much for your support. Your participation is important because CALP is the first Europe-wide cross border portal for analysing liberal professions from the point of view of regulatory and professional bodies and scientists. If for some reason the code does not work, or if it was misplaced, please contact us at calp-info@uni-koeln.de and we will send you another code.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'Martin Henssler'.

Martin Henssler
Professor and Managing Director of the ECLP
Vice-Rector for Planning and Academic Staff of University of Cologne
