SCOPE – ACTIVITIES of the ASSOCIATION

The Association for the Research of the Ancient-Greek and Byzantine Technology (EΔABuT) is a scientific Association, founded on 2014, (as an Urban Non-Profit Company). The company is located at 23-25 Lekka Str., and 34 Perikleous Str., on the 1st floor, Athens, PC 10562, in the building of the Library of TEE¹, having as scope the cultivation, development and conduct of scientific research and propagate the historical knowledge about the technological achievements of ancient Greeks till Byzantium.

This scope is served with the following means:

- Meetings/Lectures with free access to everybody, where relevant scientific matters.
- One-day seminars.
- Presentations of books and films relevant to the ancient Greek Technology.
- Antiquarian visits/guided-tours for the general public.
- Exhibitions with functional models of ancient Greek artefacts and films.
- International Conferences especially for the ancient Greek Technology.
- Participation in similar events of other Associations or Museums.
- Systematic Seminars for secondary school teachers on matters of ancient Greek technology.
- Publications of books with ancient Greek technology's issues.

Most of today's EΔABuT members have organized the following activities in the past:

- Open lectures, [*approx. Three-hundred (300) events*].
- One-day seminars [*approx. ten (10)*].
- Presentations of books and documentaries [*approx. ten (10)*].
- Antiquarian visits/guided-tours [*approx. fifteen (15)*].
- Exhibitions with functional models of ancient Greek artefacts and films: in Greece, [*eight (8)*], and abroad [*five (5)*] with *twenty-five (25)* great-scale models.
- International Conferences especially for the ancient Greek Technology [*four (4)*].
- Systematic Seminars for secondary school teachers on matters of ancient Greek technology (two monthly periods).

¹ Technical Chamber of Greece.

- Publications of books treating matters of ancient Greek technology [*three (3)*].

The interested visitors of the site can see the relevant material in the following websites:

<http://www.blod.gr/lectures/Pages/viewevent.aspx?EventID=297>, for lectures on ancient Greek Technology in greek

http://portal.tee.gr/portal/page/portal/edabyt/ekthesiako_yliko, for descriptions of eight (8) models and three (3) films.

With these activities, it is estimated that ΕΔΑΒυΤ will contribute fundamentally, today and in the future, to the further improvement of the attitude of the Greek society towards the fundamental component of the Ancient Greek Culture, which is Technology, as well as to the development of parallel activities in our country for the same purpose. The important enrichment of the Greek bibliography on ancient Greek Technology by Members of ΕΔΑΒυΤ, has also contributed to the same purpose. The important enrichment of the Greek bibliography for the ancient Greek Technology, by Members of ΕΔΑΒυΤ, has also contributed to the same goal. Finally, in the context of ΕΔΑΒυΤ, the collaboration of distinguished Greek Archaeologists with Technical Scientists has become more productive.
